

Advantages

Remote Data Backups is the most **cost effective, secure, and convenient** way to automatically back up your mission critical data offsite every night. Enjoy peace of mind knowing that if the unexpected happens (*systems crash, virus, fire, flood, theft, sabotage, etc.*) your data is safe and secure offsite at our two mirrored data centers and always easily accessible to you. We even provide **free technical support**, toll-free, 24-7.

It's Automatic

Once the initial setup is done and the first backup has started, there is typically no human intervention required. **Nightly scheduled backups** begin at the times you have scheduled. Never again will you have to depend on your employees (*or yourself*) to remember to manually perform backups and then physically take it offsite every night.

It's Fast & Easy

The small agent program is quick and easy to set up. After your initial backup, Remote Data Backups transmits only *Delta Block Level changes (vs. file level)* incrementally, so daily backups are extremely fast. Daily backups typically take **only a few minutes**, and you can either back up an entire drive or easily deselect files you don't need to back up. *The service even works with a 56K or slower modem!*

It's Secure

Remote Data Backups uses *128-Bit AES (Advanced Encryption Standard)* and *112-Bit Triple DES* encryption with *SSL (Secure Socket Layer)* technology to ensure that your data is secure from any unwanted access. Data is **transmitted and stored in encrypted format**, so no one can access your data without your personalized encryption key. We use HP Servers and EMC storage machines at *two mirrored data centers*, protected by a level of security that is extremely hard to match.

What would you do if you suddenly lost your data?

How much would it cost to recover your data?

Would your business be able to survive?

Software Features

Windows Recovery

with our 10 & 30 GB Backup plans

An invaluable tool to protect both your data and the PC it resides on. With Windows Heal, we back up not only every single file on your hard drive, but also every registry setting within your Windows operating system. So if your operating system ever becomes corrupt (which can happen at any time) or if your hard drive crashes, you can simply "roll back the clock of time" and **restore your system completely...** a significant time and money saver!

Our standard features (included in all plans) also **save you time and money**, increasing productivity and efficiency while decreasing downtime.

Remote Web Access

Remotely **access your data** 24/7 from any computer with Internet access with just your account number and encryption phrase. You can also use this feature to transfer large files from one computer to another (*no need to use a CD-R burner or email large files*).

Account Sharing

Easily **share data** between multiple computers running Remote Data Backups. Choose to share either individual directories or entire drives with another computer running Remote Data Backups. This allows you 24/7 access to the shared data on that account. Easily transfer files back and forth between your home, office, and laptop computers.

10-File Versioning

You will always be able to "go back in time" to the last 10 versions of any file on your computer, **or up to 90 days** (whichever occurs first). With just a few clicks of a mouse you can actually restore a file exactly as it was saved on a prior date. Restores are simple and can be quickly performed by the end-user.

Extended Archiving

We archive all data deleted off of your system for an additional 90 days at our data centers. Consider it your hidden "**extended recycle bin**"... just in case.

Backup Plans

100 MB File Backup

just \$29⁹⁵/mo*

Designed to back up your mission critical files, this package will automatically back up individual files such as accounting files, contact managers, and office documents. You may protect as many files as you wish, up to 100 MB. *Recommended for those with **fail-over connections**.*

4 GB Data Backup

just \$19⁹⁵/mo*

Manually select individual files or entire file folders, up to 4 GB. For less than **67 cents a day** (*the cost of a blank CD-R*), you can enjoy peace of mind knowing that your mission critical data is automatically backed up offsite every night to two mirrored data centers.

10 GB System Backup

just \$29⁹⁵/mo*

An invaluable tool to protect both your data *and* the PC it resides on for less than *\$1 per day*. With our **Windows Heal** function, Remote Data Backups not only backs up every single file on your system, up to 10 GB, but can also back up every single registry setting within Windows itself, thus allowing you to roll back your system if it crashes.

30 GB Server Backup

just \$99⁹⁵/mo*

A **cost-effective server backup** solution for those with more than 10 GB of data. Includes Windows Heal along with all the standard features. *Call for details about our over-30 GB solutions.*

* When you pay annually. Monthly is \$10 more a month.

About Us

Since 1996, Remote Data Backups has been a leader in the online backup business.

Our extensive client list includes over **100 franchise organizations** with thousands of locations. We have been an IFA Supplier Member and IFA Conference participant since 2001.

Prior to starting Remote Data Backups, CEO and Founder Daniel M. Dugal owned **Computer Paramedics**. He quickly grew it into one of the largest computer onsite computer repair and networking companies in Colorado, setting the standard for fast, reliable and certified support.

For 4 1/2 years the company also did data recovery and disaster prevention consulting. They witnessed the devastating consequences of data loss in business.

"You just don't realize how important your data is until you lose it! Face it, **hard drives** are just not built to last. And never ever underestimate the power of **disgruntled employees** to quickly bring a company to its knees by simply deleting their data and their backups! We've seen it countless times."

Full-Service Data Protection

We provide a full array of data protection services, including true **Macintosh** offsite backup solutions (macbackups.com) as well as **Enterprise** server and database backups (offsitedatabackups.com).

We also have a fleet of certified **IT consulting** technicians available to service all your needs.

Free 24/7 Support

We're always available to walk you through any issues, from installation to recovery, toll-free, 24/7, valuable assistance whenever you need it and an asset that sets you apart from competitors. For more information, please feel free to call, email or visit our website.

From Our Clients

"No one ever thinks their hardware will 'crash and burn'. But like death **it's never 'if' but 'when'!**"
— Jill Bostwick, Moran Industries / Mr. Transmission

"No longer do we have to hassle with the **daily tape back up** and weekly cleaning of the tape drive."
— Steven Bejarano, GM, Handyman Connection

"It is much more **cost effective and reliable** than manually using tape, zip, Jazz, CD or DVD drives."
— Dan Harrison, IS Mgr., Budget Blinds

"I have to say I was amazed at how **intuitive** it is. Your program works great and the price is right."
— Mike Praytor, Rainbow International

"Without this system I would have spent countless hours, perhaps days, putting my business life back together ... it's **worth every penny!**"
— Ken Thompson, AIA - San Joaquin

"I highly recommend it for its ease of use, flexibility, and the ability to **access backed up files** from any computer with Internet access."
— Rodney Givens, CFO Today / Ledger Plus
